

BuildHub

A home-renovation marketplace for Oman: homeowners post jobs, vendors bid, payment is held in escrow until the work is done, then the vendor is rated.

1 Who uses it

One platform connecting the people behind every renovation, with a safe payment flow in the middle.

Homeowner

Posts jobs, compares offers, accepts one, releases payment and leaves a review.

Vendor

Contractor, designer or store. Builds a profile, bids on open jobs and lists products.

Admin

Manages categories and users, and oversees agreements.

ASP.NET Core · .NET 10

EF Core + SQL Server
